

Remote Monitoring App FL1F IDEC SmartRelay

Monitoring at your fingertips

New

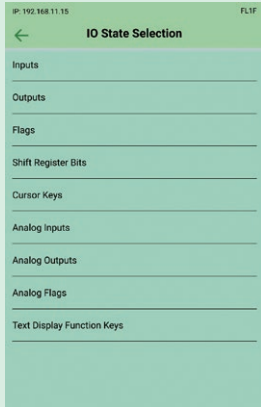

Status confirmation

The operating status (run/stop) of the FL1F at the site can be confirmed.

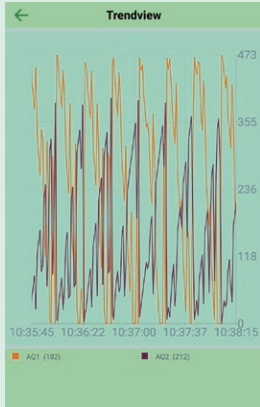

Confirm/change parameter values

Configured values/current values in the user program, such as parameters in various function blocks and network I/O, can be represented in a table and modified.

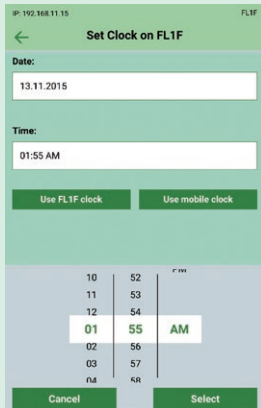

I/O status monitoring

The statuses of inputs, outputs, flags, and cursor key of the FL1F system (except remote I/O), including the expansion I/O module, can be displayed. The function key status of FL1F text display (TD) can also be displayed.

Graphical display of parameters

Several of the configured values in "IO status" and "Variables" can be selected in a table and be graphically displayed in a trendview. A further configuration of the trendview is not necessary.

Calendar setting

The FL1F date and time can be set, changed, or adjusted to the current date/ time of the connected smart device.

Detailed software manual

Download the application software manual FL9Y-B1898 and learn how to use and set up the FL1F remote monitoring app.

Download the manual for free from our website.

<http://www.idec.com/language/>

The FL1F remote monitoring app can be downloaded for free from App Store or Google Google Play. Search "FL1F" and download.

System requirement: iOS Ver. 6.0 or later

System requirement: Android Ver. 4.1 or later
