

ø22 SWITCHES & PILOT LIGHTS  
HW SERIES

# Push-in Switches & Pilot Lights

Simple wiring with Push-in technology

IDEC CORPORATION

## All thoughts focused on the same goal

Since the late 1970s, IDEC has continued to instill and pursue “Save and Safe”, as part of our corporate DNA. Along with the rapid advancement in machine intelligence and demands for environmental resistance and high reliability in recent years, we need to face societal issues such as shortage in workforce.

To solve these issues, we have set as our goals “Safe, Simple & Smart=S<sup>3</sup> (S cube)”, aiming to provide society with products and services that will bring about greater innovation and lasting quality.

# Safe

Products anyone can use with safety and assurance, from a company seeking to be number one in safety

# Simple

Products appreciated by all our customers for their ease of connection regardless of experience

# Smart

Products that make labor-saving and space-saving a reality

# Useful

We provide easy and user-friendly products with new technology.

## First in the industry Six different colors with a single LED

Previously, 5 different color LEDs were required but with the new illuminated LED unit, only a single LED is used. Only the lens needs to be replaced to change the illumination color.

The new LED reduces maintenance time, makes stock control easier, and is environmentally friendly.

## High visibility with new LED

Brighter and clearer compared to conventional LEDs

## ISO3864-4 Safety color compliant

Safety colors are defined with ISO standards.

The bright and clear colors are suited for emergency situations

- \*Except for products below
- Illuminated selector switches (illumination color: S (Blue), PW (Pure white))
- Illuminated pushbuttons (illumination color: S (Blue))

# Push-in

Smart Simple

## Simple wiring for greater work efficiency

Ferrules and solid wires can be connected simply by push-in insertion, without a screwdriver. <sup>(\*)1</sup> To remove, a flat-blade screwdriver is inserted in a simple two-action process. Since wiring can be performed regardless of operators' skill level, wiring time is reduced.

<sup>\*1)</sup> When connecting stranded wire, insert the wire while holding down the pusher with a flat-blade screwdriver.

Connecting

Push the wire straight in as far as it will go.

Connection is completed. Pull lightly to make sure it is firmly in place.

Removing

Hold down the pusher with a flat-blade screwdriver.

While holding down the pusher, pull out the wire. Release the flat-blade screwdriver.

Smart

## Time saving and efficient

Push-in connections are made simple by inserting the wire, reducing wiring time by approximately 55% compared to conventional screw terminals.

[Conditions]

Push-in: Insert wire with ferrule.

Screw terminals: With screw loosened, insert wire, then tighten with electric driver.

<sup>\*2)</sup> As of IDEC research (as of January 2020)

Safe

## Reliable and easy

Finger-safe structure and vibration resistance. What's more, the space-saving design means better workability in a smaller space.

### Stays firmly in place

Since the ferrule is held in place by a spring load, the wiring remains taut and vibration resistance is improved.

### Finger-safe structure

IP20 Finger-safe protection enables wiring to be performed without direct contact between screwdriver and conductive part.

Smart

Simple

## Wiring procedure comparison

Work can be performed without using tools and regardless of operators' skill level.

\*1) When ferrule is used.

### Conventional screw terminal

### Push-in terminal <sup>(\*)</sup>

Smart

## No additional tightening needed

Because screws are not used on push-in terminals, re-tightening of screws is not required.

# Product Upgrade

The superior functions of the conventional HW Series still remain while improving ease of use.

## Space-Saving Smart

### Contact block depth reduced

Saves space inside panel and enables downsizing of equipment.

Pilot light full voltage type

Conventional HW Series

Panel depth reduced by  
**50%  
DOWN**

Push-in HW Series

Illuminated pushbuttons 6V, 12V, 24V AC/DC

Conventional HW Series

Panel depth reduced by  
**30%  
DOWN**

Push-in HW Series

Illuminated pushbuttons 100/120V AC/DC, 200/220V AC, 230/240V AC

Conventional HW Series

Panel depth reduced by  
**40%  
DOWN**

Push-in HW Series

No transformers required for high voltage types

## Smart Smart

### High-voltage pilot lights No transformer required

Applicable for a wide range of voltage (100/120V AC/DC, 200/240V AC).

Mounts directly on control and power panels without transformers.

Ideal for use in Europe and north America for applications requiring high voltage.

### Locking lever

Usability improved by easy mounting and removal. The mounting status of the contact blocks can be confirmed at a glance from the back of the switch.

The specifications are the same as the conventional series, enabling easy installation

### Panel design

Push-in design does not change the panel design.

### Electrical rating and durability

Same electrical ratings and durability with push-in terminal contact blocks.

**NEW**

# More compact, more user-friendly pushbuttons, selector switches, key selector switches (\*1)

① Contact depth reduced for 3-contact configuration

② Up to 6-contact configurations available

Suitable for applications with complicated circuit operation.

Conventional

New

\*1) Pushbuttons (round flush, round extended, square flush, square extended), selector switches, key selector switches.

• The middle contact block may not operate depending on the operator that the customer may be using.

## High voltage LED illuminated unit for illuminated pushbuttons

100/120V AC/DC, 200/220V AC, 230/240V AC types available. No transformers required and same depth behind the panel for all illuminated voltages. High voltage models do not require transformers enabling downsizing of equipment and panels. 1-contact types also available.

Conventional screw terminal

Push-in

100/120V AC/DC, 200/220V AC, 230/240V AC types

## Angled connections

Angled connections make wiring easy even when switches are mounted on a panel. Also, 24-degree inclination faced to the panel improves the fit of the wires, and contributes to downsizing of the panel and equipment.

# Added Value

Our aim is to create products that enable customers to experience the utmost usability.

## Test point

A test point is available to check connectivity of the wiring.  
Check the connectivity easily using a tester.

## Sub-Assembled Units

Sub-assembled units can be ordered for flexible use, such as sudden changes in design.

# ø22 HW Series Push-in Switches & Pilot Lights

- Push-in terminal connection reduces wiring time.
- Safety enhanced with IP20 finger-safe protection.

- See website for details on approvals and standards.
- Note) Approvals for pushbuttons, selector switches, pilot lights only.  
For illuminated/non-illuminated buzzer (page 45) and emergency stop switches (page 46), see each page.

## Specifications and Ratings

| Life (reference value) | Approx. 50,000 hours (The luminance is reduced to 50% the initial intensity when used on complete DC at 25°C.) |                |                |                     |                  |                  |
| Internal Circuit       |  |                |                |                     |                  |                  |

### Direct Opening of Key Selector Switch

| Applicable Type                                   | 2-position           | 3-position |
|---|----------------------|------------|
| Minimum Operator Angle for Direct Opening Action  | 60° (90° Maintained) | 45°        |
| Minimum Operator Torque for Direct Opening Action | 0.4 N·m              |            |
| Maximum Operator Angle                            | 60° (90° Maintained) | 45°        |

### Degree of Protection

#### IEC60529

| Unit  | IEC 60529 |
|---|-----------|
| All models except illuminated selector switches, dual pushbuttons, pilot lights | IP65 (*1) |
| Illuminated selectors, pilot lights   | IP65      |
| Dual pushbuttons  | IP40 (*2) |

\*1) When using a nameplate with the HW series, IP65 protection degree is achieved only when nameplates shown on page 50 are used.

(IP40 when other ø22 namplates such as NWA are used)

\*2) IP65 when used with button covers (HW9Z-D7D).

#### UL50

| Unit  | UL50             |
|---|------------------|
| All models except illuminated selector switches | Type 4X (*3)(*4) |

\*3) When using a nameplate with the HW series, IP65 protection degree is achieved only when nameplates shown on page 50 are used.

\*4) For dual pushbuttons, Type 4X is achieved when used with button covers (HW9Z-D7D).

## Specifications

### Switches (except for emergency stop switch)

### Mounting Hole Layout

(Dimensions in mm)

#### Panel Cut (IEC60947-5-1)

- When high temperature is expected, take necessary measures such as securing sufficient mounting centers or using a cooling fan.
- The 3.2 mm recess is for preventing rotation and is not necessary when the nameplate or anti-rotation ring is not used.

#### Minimum Mounting Centers

(Dimensions in mm)

| Unit                          | Vertical (*7) | Horizontal (*8) |
|-------------------------------|---------------|-----------------|
| ø40mm mushroom buttons        | 50            | 40              |
| Selector pushbuttons          | 50            | 50              |
| Monolever switches            | 72            | 72              |
| Pilot lights                  | 50            | 30              |
| Dual pushbuttons              | 55            | 30              |
| Illuminated selector switches | 50            | 50              |

- For emergency stop switch mounting centers, see page 46.
- Determine the mounting centers in consideration of the operation, wiring, and testing terminals.

### Ordering Information

- Specify the Ordering No. when ordering.  
When ordering, specify button color, lens color, key removal specification, or key number codes.
- Some combinations cannot be ordered. For details, contact IDEC.
- Nameplates and accessories for mono-lever switch are ordered separately. See page 50 to 55.

- Specify a button color code in place of ⑤ in the Part No.
- Pushbuttons with 1 contact block contain 2 dummy blocks. Pushbuttons with 2 contact blocks contain 1 dummy block.

• For other specifications, select from sub-assembled units (page 13 to 14).

Pushbuttons Part No. Example

Assembled and sub-assembled unit

- For available assembled products, see above table.
- Up to 6 contacts can be used for round flush, round extended, square flush, and square extended pushbuttons.

Pushbuttons

**Sub-Assembled**

When ordering, specify the sub-assembled ordering no. See page 12 for available assembled products.

- Specify a button color code in place of ⑤ in the Part No.  
B (black), G (green), R (red), Y (yellow), S (blue), W (white)
- \*1) Only B (black), G (green), R (red) available for ø60mm mushroom.
- Up to 6 contacts can be used for square flush and square extended pushbuttons.

For Part No. (Ordering No.)/ mounting positions of contact units, see page 51.

Pushbuttons Dimensions

All dimensions in mm.

Flush

Single contact block

For Part No. (Ordering No.)/ mounting positions of contact units, see page 52.

Illuminated Pushbuttons Dimensions

All dimensions in mm.

**Round Flush**

1 to 2 contacts

HW1L-□1P

3 to 4 contacts

HW1L-□1P

**Round Extended**

1 to 2 contacts

HW1L-□2P

3 to 4 contacts

HW1L-□2P

**Round Extended with Full Shroud**

1 to 2 contacts

HW1L-□F2P

3 to 4 contacts

HW1L-□F2P

**Square Flush**

1 to 2 contacts

HW2L-□1P

3 to 4 contacts

HW2L-□1P

Illuminated Pushbuttons Dimensions

All dimensions in mm.

ø29 Mushroom

1 to 2 contacts  
HW1L-□3P

3 to 4 contacts  
HW1L-□3P

ø40 Jumbo Mushroom

1 to 2 contacts  
HW1L-□4P

3 to 4 contacts  
HW1L-□4P

Illuminated Pushbuttons Part No. Example

Assembled and sub-assembled unit

Assembled

HW1L - M 1 P 11 Q4 R

- ① Bezel shape code  
1: Round  
2: Square  
3: Round Bezel
- ② Operation code  
M: Momentary  
A: Maintained
- ③ Button style code  
1: Flush  
2: Extended  
F2: Round Extended with full Shroud  
3: ø29mm Mushroom  
4: ø40mm Mushroom
- ④ Contact configuration code  
10: 1NO  
01: 1NC  
11: 1NO1NC  
20: 2NO  
02: 2NC  
22: 2NO-2NC
- ⑤ Rated voltage code  
Q2 : 6V AC/DC  
Q3 : 12V AC/DC  
Q4 : 24V AC/DC  
QH2 : 100/120V AC/DC  
QM : 200/220V AC  
QM4 : 230/240V AC
- ⑥ Button color code  
(see page 17)

Operator unit

HW1L - M 1 R - PS

- ① Bezel shape code  
1: Round  
2: Square  
3: Round Bezel
- ② Operation code  
M: Momentary  
A: Maintained
- ③ Button style code  
1: Flush  
2: Extended  
F2: Round Extended with full Shroud  
3: ø29mm Mushroom  
4: ø40mm Mushroom
- ⑥ Button color code  
(see page 18)

Contact unit (illuminated)

HW - CN P 10 QO

- ④ Contact configuration code  
(see page 18)

• LED lamps are not supplied.

LED lamp

LSRD - 6

- ⑤ Rated voltage code  
6 : 6V AC/DC  
1 : 12V AC/DC  
2 : 24V AC/DC  
H2 : 100/120V AC/DC  
M2 : 200/220V AC  
M4 : 230/240V AC

- For available assembled products, see table on page 17.
- Up to 4 contacts can be used.

Dual Pushbuttons without Pilot Light

Sub-Assembled

Dual pushbuttons can be purchased only as a sub-assembled product.

Without Pilot Light

\*1) Interlock: Momentary operation. When one of the buttons is pressed, the other button cannot be operated.

- Do not operate top and bottom buttons at the same time. Operating the buttons at the same time may lead to malfunctions.
- For contact mounting position, see page 52.
- Specify a code in place of ⑥⑦ in the Part No. See tables below

Note) LED lamp is not supplied. When ordering contact units (illuminated) selected LED from below table.

| Code | Rated Voltage | Code | Rated Voltage  |
|------|---------------|------|----------------|
| Q2   | 6V AC/DC      | QH2  | 100/120V AC/DC |
| Q3   | 12V AC/DC     | QM   | 200/220V AC    |
| Q4   | 24V AC/DC     | QM4  | 230/240V AC    |

| LED lamp (Package Quantity: 1) |                         |
|--------------------------------|-------------------------|
| Rated Voltage                  | Part No. (Ordering No.) |
| 6V AC/DC                       | LSRD-6                  |
| 12V AC/DC                      | LSRD-1                  |
| 24V AC/DC                      | LSRD-2                  |
| 100/120V AC/DC                 | LSRD-H2                 |
| 200/220V AC                    | LSRD-M2                 |
| 230/240V AC                    | LSRD-M4                 |

- On the contact configuration marked with ★ in the table above, the rated load switching current is reduced to a half of the related current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.
- On the contact configuration marked with ☆ in the table above, contacts may overlap when the operator position is changed.
- Knob operator: white indicator on black body
- Selector switches with 1 contact block contain 2 dummy blocks. Selector switches with 2 contact blocks contain 1 dummy block.
- Turn the operator to each position accurately.

• For other contact configuration or operator position, select from sub-assembled units (page 27 to 28).

• For part no. other than maintained position, see Part No. Example on page 29.

Note: Turn the operator to each position accurately.

• Specify an operator unit code in place of ④ in the Part No.

④Operator Unit Code

| Code | Operator style | Code | Operator style |
|------|----------------|------|----------------|
| T    | Knob Operator  | L    | Lever Operator |

For Part No. (Ordering No.)/ mounting positions of contact units, see page 51.

Selector Switches (Knob / Lever Operator) 3-Position

**Sub-Assembled**

When ordering, specify the sub-assembled ordering no. See page 26 for available assembled products.

45° 3-position

- On the contact configuration marked with ★ in the table above, the rated load switching current is reduced to a half of the related current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.
- On the contact configuration marked with ☆ in the table above, contacts may overlap when the operator position is changed.
- For part no. other than maintained position, see Part No. Example on page 29.
- Specify an operator unit code in place of ④ in the Part No.

④ Operator Unit Code

| Code | Operator style | Code | Operator style |
|------|----------------|------|----------------|
| T    | Knob Operator  | L    | Lever Operator |

Note: Turn the operator to each position accurately.

Contact Block Mounting Position

For Part No. (Ordering No.) / mounting positions of contact units, see page 51.

Selector Switches (Knob / Lever Operator)

Selector Switches Part No. Example

Assembled and sub-assembled unit

Assembled (Without Pilot Light)

HW1S - 2 J T P 10

- ① Operator position code:
  - 2: 2-position, maintained
  - 21: 2-position, spring return from right
  - 3: 3-position, maintained
  - 31: 3-position, spring return from right
  - 32: 3-position, spring return from left
  - 33: 3-position, spring return two way
- ② Cam code
  - J: Specified
  - (① Operator position: 2, 3 only)
  - Blank: Not specified
- ③ Contact configuration code (see page 27)
- ④ Operator unit code
  - T: Knob Operator
  - L: Lever Operator

Operator (Without Pilot Light)

HW1S - 2 J L - PS

- ① Operator position code:
  - 2: 2-position, maintained
  - 21: 2-position, spring return from right
  - 3: 3-position, maintained
  - 31: 3-position, spring return from right
  - 32: 3-position, spring return from left
  - 33: 3-position, spring return two way
- ② Cam code
  - J: Specified
  - (① Operator position: 2, 3 only)
  - Blank: Not specified
- ④ Operator unit code
  - T: Knob Operator
  - L: Lever Operator

Contact Unit

HW- CN P 10

- ③ Contact configuration code (see page 27, 28)

① Operator position code

| Maintained (90° 2-position) |             | Spring Return (60° 2-position) |
|-----------------------------|-------------|--------------------------------|
|                             |             | Spring Return from Right<br>   |
| Cam code: blank             | Cam code: J | Cam code: blank                |

| Maintained (45° 3-position) | Spring Return (45° 3-position) |                             |                           |
|-----------------------------|--------------------------------|-----------------------------|---------------------------|
|                             | Spring return from right<br>   | Spring return from left<br> | Spring return two-way<br> |
| Cam code: Blank, J, or S    | Cam code: blank                |                             |                           |

- For available assembled products, see table on page 26.
- Up to 6 contacts can be used.

Pin tumbler keys can be purchased only as a sub-assembled product.

Key Selector Switches (Disc Tumbler Key / Pin Tumbler Key) 2-Position

Sub-Assembled

When ordering, specify the sub-assembled ordering no. See page 30 for available assembled products.

90° 2-position

Package Quantity: 1

• For part no. other than maintained position, see Part No. Example on page 33.

- Each selector key switch is supplied with two keys.
- Specify the key style in ③.

- Specify the desired key removal position in ④. } See page 33 Part No.
- Specify the key number in ⑥. } Development for details.

③Key type code

| Code  | Key Operator Shape |
|-------|--------------------|
| Blank | Disc tumbler       |
| P     | Pin tumbler        |

For Part No. (Ordering No.)/ mounting positions of contact units, see page 51.

Pin tumbler keys can be purchased only as a sub-assembled product.

Key Selector Switches (Disc Tumbler Key / Pin Tumbler Key) 3-Position

Sub-Assembled

When ordering, specify the sub-assembled ordering no. See page 30 for available assembled products.

45° 3-position

- On the contact arrangement marked with ★ in the table above, the rated load switching current is reduced to a half of the related current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.
- For models with ☆, contacts may overlap when the operator position is changed.
- For part no. other than maintained position, see Part No. Example on page 33.
- Each selector key switch is supplied with two keys.
- Specify the key style in ③.
 

| Code  | Key Operator Shape |
|-------|--------------------|
| Blank | Disc tumbler       |
| P     | Pin tumbler        |
- Specify the desired key removal position in ④. } See page 33 Part No. Development for details.
- Specify the key number in ⑥. }

Contact Block Mounting Position

For Part No. (Ordering No.)/ mounting positions of contact units, see page 51.

Key Selector Switches (Disc Tumbler Key / Pin Tumbler Key)

Key Selector Switches Part No. Example

- Specify an illumination color code in place of Ⓒ in the Part No.
- Turn the operator to each position accurately.

• For other contact configuration or operator position, select from sub-assembled units. (page 36 to 37).

Contact Block Mounting Position

Note) (2) can only be mounted with a full voltage adapter.

Illuminated Selector Switches (Knob / Lever Operator) (LED) 2-Position

**Sub-Assembled**

When ordering, specify the sub-assembled ordering no. See page 35 for available assembled products.

90° 2-position

• Specify an operator unit code in place of ③ in the Part No.

③Operator Unit Code

| Code  | Operator style |
|-------|----------------|
| Blank | Knob Operator  |
| L     | Lever Operator |

• Specify a rated voltage code in place of ⑤ in the Part No.

| Code | Rated voltage | Code | Rated voltage  |
|------|---------------|------|----------------|
| Q2   | 6V AC/DC      | QH2  | 100/120V AC/DC |
| Q3   | 12V AC/DC     | QM   | 200/220V AC    |
| Q4   | 24V AC/DC     | QM4  | 230/240V AC    |

• Specify an illumination color code in place of ⑥ in the Part No.  
R (red), G (green), Y (yellow), A (amber), S (blue), PW (pure white)

• For part no. other than maintained position, see Part No. Example on page 38.

Note) LED lamp is not supplied. When ordering contact units (illuminated) selected LED from below table.

| LED lamp (package quantity:1) |                            |
|-------------------------------|----------------------------|
| Rated Voltage                 | Part No.<br>(Ordering No.) |
| 6V AC/DC                      | LSRD-6                     |
| 12V AC/DC                     | LSRD-1                     |
| 24V AC/DC                     | LSRD-2                     |
| 100/120V AC/DC                | LSRD-H2                    |
| 200/220V AC                   | LSRD-M2                    |
| 230/240V AC                   | LSRD-M4                    |

For Part No. (Ordering No.) / mounting positions of contact units, see page 51.

Illuminated Selector Switches (Knob / Lever Operator) (LED) 3-Position

**Sub-Assembled**

When ordering, specify the sub-assembled ordering no. See page 35 for available assembled products.

**45° 3-position**

Package Quantity: 1

- Specify a button color code in place of ③ in the part No.
- When operating the pushbutton selector, do not turn the operator ring or the lock lever while the button is depressed. Otherwise the pushbutton selector may be damaged.

• For other circuit codes, select from sub-assembled units (page 40).

Contact Block Mounting Position

Note) (2) can only be mounted with a dummy block.

Dimensions

All dimensions in mm.

Selector Pushbuttons Part No. Example

Assembled and sub-assembled unit

Assembled Part No. Example

HW1R - 2 D P 20 B

- ① Circuit code
- ② Contact configuration code
  - 11: 1NO1NC
  - 20: 2NO
  - 22: 2NO-2NC
  - 11N1: 1NO-1NC
  - 22N2: 2NO-2NC
- ⑤ Button color code (see page 40)

Operator unit

HW1R - 2 A B - PS

- ① Circuit code
- ③ Button color code (see page 40)

Contact unit

HW - CN P 10

- ⑤ Contact configuration code (see page 40)

- For available assembled products, see table on page 40.
- Up to 4 contacts can be used.

Selector Pushbuttons

**Sub-Assembled**

When ordering, specify the sub-assembled ordering no. See page 39 for available assembled products.

**Sub-Assembled Ordering No.**

- On the contact arrangement marked with ★ in the table above, the rated load switching current is reduced to a half of the related current of the contact block.  
The rated insulation voltage and the rated thermal current remain unchanged.
- For models with ☆, contacts may overlap when the operator position is changed.
- When operating the pushbutton selector, do not turn the operator ring or the lock lever while the button is depressed. Otherwise the pushbutton selector may be damaged.
- For contact mounting position, see page 51.
- Up to 4 contacts can be used.

For Part No. (Ordering No.)/ mounting positions of contact units, see page 51.

Momoloever switches can be purchased only as a sub-assembled product.

Monolever Switches

Sub-Assembled

When ordering, specify the sub-assembled ordering no.

Sub-Assembled Ordering No.

Contact Block Mounting Position

Note) (2) can only be mounted with a dummy block.

Note) The lever operator of the interlocking type HW1M-L is locked only in the center position. Pull on the interlocking lever before operating the lever up/down/right/left.

Monolever Switches Part No. Example

Assembled and sub-assembled unit

Assembled Part No. Example

**HW1M-L P 1 0 1 0 - 20**

- ① Model: HW1M: Standard, HW1M-L: Interlocking
- ② Lever operation mode Order of Entry: Up - Right - Down - Left; 1: Maintained, 2: Spring returned, 0: Blocked
- ③ Contact configuration code: Select a required contact operation at each lever operator position from the contact arrangement charts above and specify the Contact Code.

Operator unit

**HW1M - L 1 0 1 0 - PS**

- ① Model: HW1M: Standard, HW1M-L: Interlocking
- ② Lever operation mode Order of Entry: Up - Right - Down - Left; 1: Maintained, 2: Spring returned, 0: Blocked

Contact unit

**HW- CN P 10 20**

- ③ Contact configuration code: Select a required contact operation at each lever operator position from the contact arrangement charts above and specify the Contact Code.

- For available assembled products, see table on page 41.
- Up to 4 contacts can be used.

- Built-in BA9S base LED lamp. See page 57 for LED Lamps.
- For round flush and square flush pilot lights, legends and symbols can be engraved on marking plates, or printed film can be inserted. For details on marking plates or film, see page 63. Engraving and films must be prepared by the customer.
- Specify a lens color code in place of ① in the Part No.

Short Body Pilot Lights

Illuminated / Non-Illuminated Buzzers

# Easy installation of buzzers and lamps

- Short, 19.7 mm depth behind panel.
- Buzzer and lamp functions are integrated. (Illuminated buzzers)
- IP65 waterproof from the front of the panel
- Installing an optional terminal rubber boot upgrades the terminal's waterproof characteristics to IP54 without the need to use a rear enclosure.

• See website for details on approvals and standards.

## Dimensions

All dimensions in mm.

### With terminal rubber boot

\*1: ø4.5-5.5 cable needs no cutting.

\*2: The bellows must be 17 to 22mm long after installing the terminal rubber boot.

\*3: Maintain a cable angle of 45° max. to the HW1Z axis.

## Terminal Arrangement (bottom view)

X1 and X2 have no polarity.

## Mounting Hole Layout

3.2<sup>+0.2</sup> hole is for anti-rotation.

Not required when nameplate/anti-rotation is not used.

Instructions for Illuminated / Non-illuminated buzzers: see page 66

Emergency Stop Switches

# Emergency Stop Switches

- Direct opening action (IEC 60947-5-5; 5.2, IEC 60947-5-1; Annex K)
- Safety lock mechanism (IEC 60947-5-5; 6.2)
- Degree of Protection IP65 (IEC 60529)

• See website for details on approvals and standards.

- Pushlock turn reset – Button is maintained when pressed and is reset when turned clockwise.
- Emergency stop switches with 1 contact block contain 2 dummy blocks. Pushbuttons with 2 contact block contains 1 dummy block.

• For other specifications, select from sub-assembled units (page 48).

Sub-assembled operator unit

HW1B - V 3 R - PS

- ①Operation code  
V: Pushlock Turn Reset  
Y: Push Pull
  - ②Button style code  
3: ø29mm Mushroom (pushlock turn reset)  
4: ø40mm Mushroom (pushlock turn reset)  
5: ø60mm Mushroom (pushlock turn reset)  
2: ø40mm Mushroom (push pull)
  - ④Button color code (see page 48)
- Note) Only up to 2 contacts can be used for push-pull switches

- For available assembled products, see table above.
- Up to 4 contacts can be used.

Sub-assembled contact unit

HW- CN P 10

- ③Contact configuration code  
01: 1NC  
11: 1NO-1NC  
02: 2NC  
12N2: 1NO-2NC  
03N2: 3NO  
22: 2NO-2NC  
04: 4NC
- Note) When choosing sub-assembled push-pull operators, only up to 2 contacts can be used.

Note

- For emergency stop purposes, these switches must contain at least one NC contact block.

Emergency Stop Switches

**Sub-Assembled**

When ordering, specify the sub-assembled ordering no. See page 47 for available assembled products.

**Pushlock Turn Reset**

- Contact unit includes a contact block, connecting unit.
- Switches with 1 contact block contain 2 dummy blocks. Switches with 2 contact blocks contain 1 dummy block.

\*1) For pushbuttons (round flush, round extended, square flush, square extended) selector switches, and key selector switches only.

Contact Unit

Contact Unit (illuminated) Part No. / Contact Configuration

Package Quantity: 1

| Contact Configuration (Code) | Part No. (Ordering No.) | Mounting Position | Contact              |

- Contact unit (illuminated) includes a contact block, full voltage adapter, and connecting unit.
- Switches with 1 contact block contain 2 dummy blocks. Switches with 2 contact blocks contain 1 dummy block.

Note) LED lamp is not installed. When ordering a contact unit (illuminated), select a LED lamp from below.

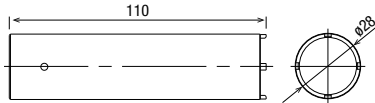

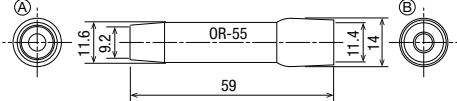

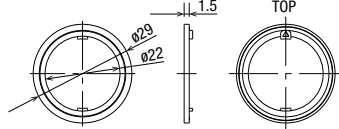

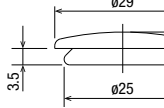

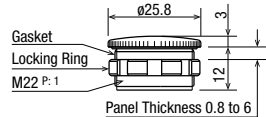

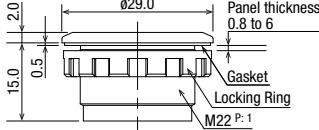

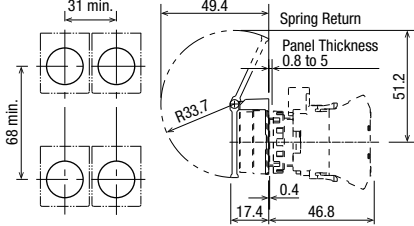

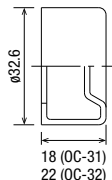

| LED lamp (package quantity:1)   |                         |

## ⚠ Safety Precautions

- Turn off the power to the HW series switches & pilot lights before starting installation, removal, wiring, maintenance, and inspection of the products. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid a burn on your hand, use the lamp holder tool when replacing lamps.
- For wiring, use wires of a proper size to meet the voltage, current requirements, and the number of connectable wires (page 65). Failure to tighten the terminal screws may cause overheating and fire.
- Avoid using in places mentioned below to maintain performance of the product.
  - Exposed to direct sunlight
  - Subject to corrosive or flammable gases

## Instructions

### Panel Mounting

1. Remove the contact block from the operator.
2. Remove the locking ring from the operator.
3. Insert the operator into the panel cut-out from the front. When mounting the nameplate, insert between the operator and panel.
4. Tighten the locking ring from the back.

Mounting panel thickness is reduced by 1.5 mm when using a nameplate.

### Removing the Contact Block

1. Remove the operator from the contact block by pushing and turning the locking lever in the direction of the arrow shown below. Then the operator can be pulled out.
2. To reinstall, place the TOP marking on the operator and the lock lever in the same direction, and insert the operator into the contact block mounting adapter. Then turn the locking lever in the opposite direction.

### Anti-rotation Ring and Mounting Panel

Turn the TOP marking on the operator and the ▲ mark on the anti-rotation ring to the recess on the mounting panel.

### Installing the Pilot Light

Detach the operator from the LED unit. After mounting the operator from the front of the panel, attach the LED unit.

### Installing / Removing the LED Unit

1. Detach the LED unit by lifting the latch using a small flat blade screwdriver width 0.5mm max.
2. To install, align the TOP marking on the operator with the TOP marking on the LED unit.

### Notes for Panel Mounting

Locking ring wrench recommended torque  
Tighten the bezel to a tightening torque of 2.0 N·m.

Locking ring wrench (MW9Z-T1) can be used to tighten the bezel. Do not use pliers. Excessive tightening will damage the locking ring.

Locking ring wrench (MW9Z-T1)

### Panel Thickness

HW series can be mounted on a panel with thickness of 0.8 to 6.0 mm (switches) and 0.8 to 4.5 mm (pilot lights). Take the thickness of nameplate and/or switch guard into consideration.

Instructions

**Replacing LED Lamps**

Lamps can be replaced using the lamp holder tool (OR-55) from the front of the panel, or by removing the contact block from the operator unit. (See page 53 for lamp holder tool.)

**Removing the LED lamp from the front of the panel**

**Removing**

To remove, slip the lamp holder tool onto the lamp head lightly. Then push slightly, and turn the lamp holder tool counterclockwise.

**Installing**

Insert the lamp head into the lamp holder tool.

Place the pins on the lamp base to the grooves in the lamp socket. Insert the lamp and turn it clockwise.

**Removing and Installing the Contact Blocks, Dummy Blocks, and LED Units**

**Removing**

To remove the contact block and dummy block, insert into the flat blade screwdriver latch and move in the direction of the arrow.

**Installing**

When installing the contact block or dummy block, make sure that it snaps on to the operator. For No. 1 and 3 only a contact block or dummy block can be installed. For No. 2, only a dummy block can be installed.

Note) Make sure to attach a correctly assembled connection unit to the operator.

Note) When attaching the contact block to the connection unit, make sure that the connection is detached from the operator. If a contact block is installed with the operator attached to the connection unit, malfunction of the switch may occur.

Note) Full voltage adapters cannot be removed or attached with contact blocks attached.

Note) Attach the full voltage adapter vertically to the connection unit.

**Test Points**

Note) Do not insert wires into the test point.

**Single contact block**

Note) When conducting a continuity test on the contact block, make sure that probes (ø2.0 maximum) of the tester are inserted vertically to the panel.

**Double contact block**

When conducting a continuity test on the first deck, make sure that probes (ø2.0 maximum) of the tester are inserted in an angle of the contact block, in two places as shown below.

When conducting a continuity test on the second deck, make sure that probes (ø2.0 maximum) of the tester are inserted vertically to the panel.

Instructions

Installing/Removing the Buttons and Lenses

<To install>

<To remove>

Pushbutton Button

• **Flush/Extended**  
Push in the button to install.

Insert a flat screwdriver between the button and the bezel to remove the button.

• **Mushroom/Jumbo Mushroom**

Button has threads. Turn clockwise to install the button.

Turn the button counterclockwise to remove.

Note: Jumbo mushroom button cannot be removed.

Illuminated Pushbutton Lens

• **Flush/Extended**  
Push in the lens holder into the operator unit.

Insert a flat screwdriver between the button and the bezel to remove the lens holder.

• **Mushroom/Jumbo Mushroom**

Lens has threads. Turn clockwise to install the lens.

Lens has threads. Turn counterclockwise to remove the lens.

Pilot Light Lens

• **Extended**

Lens has threads. Turn clockwise to install the lens.

Turn the lens counterclockwise to remove.

• **Round Flush/Square Flush**

Push in the lens holder into the operator unit.

Insert a flat screwdriver between the lens and the bezel to remove.

Installing/Removing the Lenses and Marking Plates

Removing the lens unit

Insert a flat screwdriver in groove of the lens (TOP mark side of the operator or opposite side) to remove the lens unit (lens/marketing plate/ lens holder).

Removing the lens

Remove the lens by pushing the lens from the rear to disengage the latches between the lens and the lens holder, using a flat screwdriver as shown below.

Note: The translucent filter in the lens holder cannot be removed because this filter is sealed to make the unit waterproof and oiltight.

Installing

1. Place the marking plate on the lens holder with the anti-rotation projection engaged and press the lens onto the lens holder to engage the latches.
2. Place the marking plate in the correct orientation.

For Square Lens (square flush lens)  
\*Note the orientation of the parts.

Lens    Marking plate    Lens holder

Instructions

Using a Ring Adapter

HW9Z-A25

Install the ring adapter between the HW series unit and panel. Make sure that the side with ridges face the panel.

Nitril Rubber

Installation

Panel Cut-out

HW9Z-A30

The ring adapter HW9Z-A30 consists of a washer and adapter. Install adapter between the HW series unit and panel. Install washer between the locking ring and panel.

Washer: metal (brass)

Adapter: polyamide

Installation

Panel Cut-out

Dual Pushbutton Switches

The pushbuttons cannot be removed or replaced. Do not attempt to remove using a flat screwdriver or pincers, otherwise the pushbuttons may be damaged.

Installing the Rubber Boot for Dual Pushbuttons

When using the HW7D pushbuttons in places where the pushbuttons are subject to water splash or an excessive amount of dust, make sure to use the HW9Z-D7D rubber boot (IP65) which is ordered separately. Remove the rubber gasket pre-installed on the operator, and install the rubber boot from the front of the button.

Notes for Installing the Rubber Boot

Remove the gasket from the operator, and install the rubber boot on the operator. Pull out the seals of the rubber boot and place them around the operator sleeve as shown. Make sure that the seals are not twisted or tucked inside and that the gasket does not remain, otherwise the normal waterproof and dustproof characteristics are not ensured.

Rubber Boot Installed

Selector Switches

Turn the operator such as knob, lever, and key to each position accurately. Releasing halfway may cause the operator to return to the former position, or to get stuck between. On spring return two-way types, the center of operators may be misaligned slightly.

Key Selector Switches

Observe the following instructions to prevent malfunction or damage.

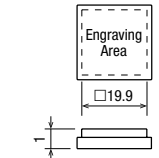

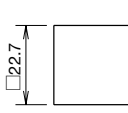

- Turn the key securely to each position.
- Insert the key to the bottom of the key hole.
- Do not remove the key from any key retained position.
- Use a key that matches with the number on the key cylinder. However, for standard keys, the key number is engraved on the key but not on the key cylinder.

## Instructions

### Marking

For HW series pilot lights, legends and symbols can be engraved on the built-in marking plates, or printed film can be inserted under the lens for labeling purposes.

#### Marking plate and marking film size (mm)

| Built-in marking plate and engraving area   | Applicable marking film size   |
|---|--|
| <p>Outside diameter:<br/>□22.7</p> <p>Engraving depth:<br/>0.5mm max.</p>  |  <p>• Two 0.1 mm-thick films or one 0.2 mm-thick film</p> |

\*Marking films are not supplied.

### Insertion Order of Marking Plate and Film

#### Square Lens (Square flush lens)

Note: Films are not supplied. When inserting a film, make sure that the marking plate is installed with its uneven side facing the lens holder.

### Nameplate

Mounting panel thickness is reduced by 1.5 mm when using a nameplate.

#### Installing a Marking Plate

Insert a marking plate in the direction of the arrow ①, and press in as shown ②.

#### Removing a Marking Plate

Insert a flat screwdriver into the upper middle part of the marking plate and remove. When anti-rotation is not required, remove the projection from the nameplate using pliers.

### Applicable Wire

When wiring, use the applicable wires shown below.

#### Applicable Wire and Specifications

|                        |  |
|------------------------|--|
| Applicable Wire (*1)   | 0.25 to 1.5mm <sup>2</sup> (AWG16 to 24) |
| Wire Strip Length (*2) | 8 ± 1mm (*3)                             |

\*1) For applicable wires confirmed by IDEC, see website.

\*2) For details on ferrules, see "Wire Size and Recommended Ferrules" table below.

\*3) Strip the sheath of the wire 8±1mm from the end.

Note: Make sure that the stranded wires do not loosen when using wiring without ferrules.

### Wire Size and Recommended Ferrules

#### Ferrules with insulated covers

| Applicable Wire (Stranded Wire) |                 | Wire Strip Length | IDEC Part No.  |
|---------------------------------|-----------------|-------------------|----------------|
| AWG                             | mm <sup>2</sup> |                   |                |
| 24                              | 0.25            | 10 to 11mm        | S3TL-H025-12WJ |
| 22                              | 0.34            | 10 to 11mm        | S3TL-H034-12WT |
| 20                              | 0.50            | 10 to 11mm        | S3TL-H05-14WA  |
| 18                              | 0.75            | 10 to 11mm        | S3TL-H075-14WW |
| 18                              | 1.00            | 10 to 11mm        | S3TL-H10-14WY  |
| 16                              | 1.50            | 10 to 11mm        | S3TL-H15-14WR  |

#### Recommended Crimping Tool (Optional)

| Item          | IDEC Part No. |
|---------------|---------------|
| Crimping tool | S3TL-CR04T    |
|               | S3TL-CR06D    |

Note 1) Note the crimping dimensions when using tools other than the recommended crimping tool. For details, see page 55.

Note 2) The above crimping tool cannot be purchased from IDEC.

#### Recommended Screwdriver (Optional)

| Item                   | IDEC Part No.  |
|------------------------|----------------|
| Flat blade screwdriver | S3TL-D04-20-60 |
|                        | S3TL-D04-25-75 |

Note) Use a flat blade screwdriver with a blade size of 0.4×2 to 2.5 mm.

• For details on crimping tools, see page 55.

Instructions

**Wiring Procedure**

**Connecting the wire**

**Stranded wires with ferrules or solid wire**

- ① Insert the wire to the back of the wire port.
- ② After wiring, tug lightly to make sure that the wire is properly connected.

**Stranded wire**

- ① While pressing the pusher (orange button) using a flat blade screwdriver (recommended: S3TL-D04-20-60 (optional)). Insert the wire fully in the wiring port. Wire is connected when the pusher is released.
- ② After wiring, tug lightly to make sure that the wire is properly connected.

**Crimping of Ferrules and Wiring**

- Choose an appropriate ferrule for the wire.
- Cut the wire carefully to get a flat end.
- Make sure that ferrule sleeve is completely filled by the conductor. Depending on the cross section, the conductor should protrude approx. 0 to 1 mm from the ferrule sleeve.

- When crimping, refer to the instructions of the crimping tool.

**Faults which can occur during crimping:**

- Cracks along the sides and die impressions
- Splitting of the ferrules
- Asymmetrical crimping shape
- Extreme burrs formed along the sides
- Ferrule not filled by conductor
- Single conductors pushed back by protruding from the insulated cover
- Single conductors squeezed off
- Insulation cover damaged by the crimping jaw
- Conductor insulation not pushed into the insulated cover
- Ferrule bent longitudinally after crimping

## Instructions

### Crimping dimensions: W2.4×H1.9 mm

Maximum connectable crimping size is W2.4×H1.9. Make sure that the ferrule size will be smaller than this dimension. (See page 55 for recommended crimping tools)

- Note 1) If a tool other than the recommended crimping tool is used, the ferrule may not be crimped to the appropriate size and the clamp or spring inside the contact block may be deformed and may not operate normally.  
 Note 2) Pin crimp terminals cannot be used.

### Removing the Wire

When removing the wire, push the pusher using a flat blade screwdriver (recommended: S3TL-D04-20-60 (optional: see page 55)) and pull wire out in the direction of the arrow.

#### <Notes>

- Operate the pusher with a force of 20N. Do not press excessively. Otherwise, the switch may be damaged.
- Do not pull the wire out without depressing the pusher. When pulling the wire, be sure to pull in a straight direction. Otherwise, the socket may be damaged.

### Number of Connectable Wires

| Unit               | Connectable wires |   | No. of connectable wires |
|--------------------|-------------------|---|--------------------------|
| HW-P Contact block | Solid wire        | 0.25 to 1.5mm <sup>2</sup><br>(AWG16 to 24)   | 2                        |
|                    | Stranded wire     | 0.25 to 1.5mm <sup>2</sup><br>(AWG16 to 24)   |                          |
| Pilot light        | Ferrule           | Without insulated cover<br>0.25mm <sup>2</sup> : conductor length:5 to 10mm<br>0.5 to 1.0mm <sup>2</sup> : conductor length: 6 to 10mm<br>1.5mm <sup>2</sup> : conductor length 8 to 10mm<br>With insulated cover<br>0.25 to 1.0mm <sup>2</sup> : conductor length 6 to 10mm<br>1.5mm <sup>2</sup> : conductor length 8 to 10mm<br>Note) Pin terminals cannot be used |                          |

Note) Only one wire can be inserted into one wire port.

Instructions (Illuminated / Non-illuminated Buzzers)

**Installing the terminal rubber boot**

1. Cut the end of terminal rubber boot to fit the cable size.
2. Insert the cable into the terminal rubber boot in the direction of arrow shown below.
  - Cut here when cable size is ø5.5 to 6.5 mm
  - Cut here when cable size is ø6.5 to 7.5 mm
  - Cut here when cable size is ø7.5 to 8.5 mm
3. Strip the insulation of the cable 30 mm from the end and wire as instructed in "Wiring".
4. Install the terminal rubber boot as shown below.

5. Cover part B with part A.
6. Make sure that the bellows is 17 to 22 mm long.

**Note for terminal rubber boot**

- Be sure to use bellows with an appropriate length. Otherwise, waterproof characteristics cannot be achieved.
- Maintain a cable angle of 45° maximum to the axis of the buzzer, otherwise the terminal rubber boot may come off.

**Panel Mounting**

- Insert the buzzer into the panel cut-out from the front, and tighten the locking ring from the back.

**Note for panel mounting**

- Use the optional locking ring wrench (MW9Z-T1) to tighten the locking ring to a recommended tightening torque of 1.5 to 2.0 N·m.
- Do not use pliers and do not tighten excessively, otherwise the buzzer may be damaged.

**Wiring Procedure**

**Connecting the wire**

**Solid wire**

Strip the insulation of the cable from 8mm from the end and insert into the wire port. After wiring, tug lightly to make sure that the wire is properly connected.

**Stranded wire with ferrule**

Crimp a ferrule with a conductor length of 8mm and insert to the back of the wire port. After wiring, tug lightly to make sure that the wire is properly connected.

**Recommended ferrule**

| Item                               | Phoenix Contact Recommended Part No. | IDEC Part No.  |
|------------------------------------|--------------------------------------|----------------|
| Ferrule (without insulation cover) | A0,5-8                               | —              |
|                                    | A0,75-8                              |                |
|                                    | A1-8                                 |                |
| Ferrule (with insulation cover)    | A10,25-8YE                           | S3TL-H025-12WJ |
|                                    | A10,5-8WH                            | S3TL-H05-14WA  |
|                                    | A10,75-8GY                           | S3TL-H075-14WW |

**Stranded wire**

Strip the wire insulation 8mm from the end and push in the wire removal part above the wire port using a small flat screwdriver. Release the wire removal part. Make sure that the wire does not loosen.

**Wire removal**

Push in the white wire removal part above the wire ports using a small flat screw driver, and pull out the wire.

**Flat blade screwdriver**

Use a optional flat blade screwdriver (SDS 0.4×2.5×75 (see page 42)) or a commercial screwdriver (blade shape: straight, blade size 2.5mm)

**Notes for wiring**

- Make sure that the terminal is not constantly pulled by the wire.
- Wiring must be performed in environments of -5 to +50°C.
- Do not damage the conductor wire when stripping the wire insulation.
- Do not use wires with bent or deformed conductors wires. Deformed wiring may cause failures such as strength degradation and overheating. Connecting one wire per terminal. Connecting two wires to a terminal may cause loose wiring and strength degradation.
- Do not solder the conductor lines. Connecting soldered stranded wires may loose wiring and strength degradation.
- If a stranded wire has loose wires, twist the conductor wires before connection. However be careful not to twist excessively.

## Instructions (Emergency Stop Switches)

When using the HW series control units in a safety-related circuit of a control system, observe safety rules and regulations of each country concerning particular applications of the actual machines and facilities. Perform risk assessment before operation to ensure safety.

### Chattering / Contact Bounce

When the button is reset by pulling or turning, the NC main contacts will bounce. When pressing the button, the NO monitor contacts will bounce. When designing a control circuit, take the contact bounce time into consideration (reference value: 20 ms).

Also, do not apply shock to the switch as chattering may occur.

### Nameplate or Switch Guard

When anti-rotation is not required, remove the projection from the nameplate or switch guard using pliers. Mechanical indicator types have projections on the operator. Make sure to remove the projection on the nameplate or switch guard.

### Handling

Do not expose the switch to excessive shocks and vibrations, otherwise the switch may be deformed or damaged, causing malfunction or operation failure.

# Ordering Terms and Conditions

Thank you for using IDEC Products.

By purchasing products listed in our catalogs, datasheets, and the like (hereinafter referred to as "Catalogs") you agree to be bound by these terms and conditions. Please read and agree to the terms and conditions before placing your order.

## 1. Notes on contents of Catalogs

- (1) Rated values, performance values, and specification values of IDEC products listed in this Catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.  
Also, durability varies depending on the usage environment and usage conditions.
- (2) Reference data and reference values listed in Catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.
- (3) The specifications / appearance and accessories of IDEC products listed in Catalogs are subject to change or termination of sales without notice, for improvement or other reasons.
- (4) The content of Catalogs is subject to change without notice.

## 2. Note on applications

- (1) If using IDEC products in combination with other products, confirm the applicable laws / regulations and standards.  
Also, confirm that IDEC products are compatible with your systems, machines, devices, and the like by using under the actual conditions. IDEC shall bear no liability whatsoever regarding the compatibility with IDEC products.
- (2) The usage examples and application examples listed in Catalogs are for reference purposes only. Therefore, when introducing a product, confirm the performance and safety of the instruments, devices, and the like before use. Furthermore, regarding these examples, IDEC does not grant license to use IDEC products to you, and IDEC offers no warranties regarding the ownership of intellectual property rights or non-infringement upon the intellectual property rights of third parties.
- (3) When using IDEC products, be cautious when implementing the following.
  - i. Use of IDEC products with sufficient allowance for rating and performance
  - ii. Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that an IDEC product fails
  - iii. Wiring and installation that ensures the IDEC product used in your system, machine, device, or the like can perform and function according to its specifications
- (4) Continuing to use an IDEC product even after the performance has deteriorated can result in abnormal heat, smoke, fires, and the like due to insulation deterioration or the like. Perform periodic maintenance for IDEC products and the systems, machines, devices, and the like in which they are used.
- (5) IDEC products are developed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use an IDEC product for these applications, unless otherwise agreed upon between you and IDEC, IDEC shall provide no guarantees whatsoever regarding IDEC products.
  - i. Use in applications that require a high degree of safety, including nuclear power control equipment, transportation equipment (railroads / airplanes / ships / vehicles / vehicle instruments, etc.), equipment for use in outer space, elevating equipment, medical instruments, safety devices, or any other equipment, instruments, or the like that could endanger life or human health
  - ii. Use in applications that require a high degree of reliability, such as provision systems for gas / waterworks / electricity, etc., systems that operate continuously for 24 hours, and settlement systems
  - iii. Use in applications where the product may be handled or used deviating from the specifications or conditions / environment listed in the Catalogs, such as equipment used outdoors or applications in environments subject to chemical pollution or electromagnetic interference  
If you would like to use IDEC products in the above applications, be sure to consult with an IDEC sales representative.

## 3. Inspections

We ask that you implement inspections for IDEC products you purchase without delay, as well as thoroughly keep in mind management/maintenance regarding handling of the product before and during the inspection.

## 4. Warranty

- (1) Warranty period  
The warranty period for IDEC products shall be one (1) year after purchase or delivery to the specified location. However, this shall not apply in cases where there is a different specification in the Catalogs or there is another agreement in place between you and IDEC.
- (2) Warranty scope  
Should a failure occur in an IDEC product during the above warranty period for reasons attributable to IDEC, then IDEC shall replace or repair that product, free of charge, at the purchase location / delivery location of the product, or an IDEC service base. However, failures caused by the following reasons shall be deemed outside the scope of this warranty.
  - i. The product was handled or used deviating from the conditions / environment listed in the Catalogs
  - ii. The failure was caused by reasons other than an IDEC product
  - iii. Modification or repair was performed by a party other than IDEC
  - iv. The failure was caused by a software program of a party other than IDEC
  - v. The product was used outside of its original purpose
  - vi. Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and Catalogs
  - vii. The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from IDEC.
  - viii. The failure was due to other causes not attributable to IDEC (including cases of force majeure such as natural disasters and other disasters)Furthermore, the warranty described here refers to a warranty on the IDEC product as a unit, and damages induced by the failure of an IDEC product are excluded from this warranty.

## 5. Limitation of liability

The warranty listed in this Agreement is the full and complete warranty for IDEC products, and IDEC shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to an IDEC product.

## 6. Service scope

The prices of IDEC products do not include the cost of services, such as dispatching technicians. Therefore, separate fees are required in the following cases.

- (1) Instructions for installation / adjustment and accompaniment at test operation (including creating application software and testing operation, etc.)
- (2) Maintenance inspections, adjustments, and repairs
- (3) Technical instructions and technical training
- (4) Product tests or inspections specified by you

The above content assumes transactions and usage within your region. Please consult with an IDEC sales representative regarding transactions and usage outside of your region. Also, IDEC provides no guarantees whatsoever regarding IDEC products sold outside your region.
